Atlassian Analytics Dashboard Templates
let you quickly set up analysis of your value delivery.

Platform features

Atlassian Analytics - Comprehensive insights across Atlassian product data and your toolchain with visual mode query tools and 20+ powerful template dashboards and charts.

> "
> Having access to almost all information related to our team's project as well as other team's projects has been a godsend, especially in a hybrid work environment. It saves us 3.5–5 hours every week.
>
> **JAY CORK**
> **DevOps Engineer, Met Office**

Product features

Jira Product Discovery - A dedicated tool for product teams to capture and prioritize ideas, connect business and tech teams, and align everyone.

New views in Jira - Deployment, Progressive Delivery, and Security views inside of Jira allow you to visualize and take action on your entire software development lifecycle right from Jira.
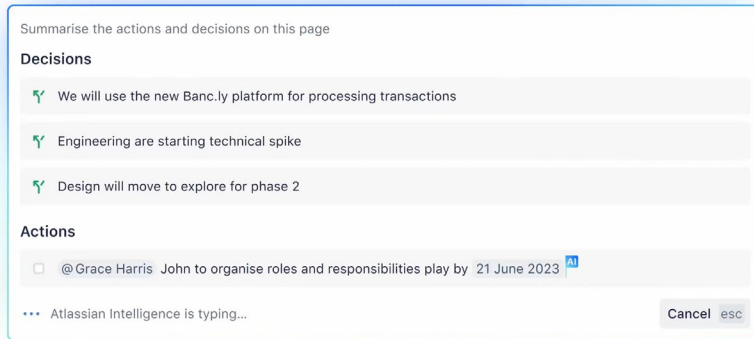

JIRA SOFTWARE

Team field in Jira - Search, filter, and view assigned issues by Team.

JIRA SOFTWARE   JIRA SERVICE MANAGEMENT

Collaborate more effectively

Connect and work with other teams to achieve shared goals in an increasingly remote, distributed, and flexible workplace.

Atlassian Intelligence saves time and pushes collaboration forward. For example, it can summarize actions and decisions from Confluence pages or auto-assigning tickets in Jira.

Platform features

Atlassian Intelligence (EAP) - Your new virtual teammate that accelerates your work with the power of AI through internal models and our collaboration with OpenAI.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT` `CONFLUENCE`

Embedded pages - Share knowledge, collaborate, and update dynamic content from your favorite Atlassian and third-party tools without leaving the product that you're already using.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT`

Smart link enhancements - Embed work from even more Atlassian tools like Trello and Atlassian Analytics as well as integrations like Dovetail and Amplitude - now with enhanced functionality including aggregation, creation, and link search.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT` `CONFLUENCE` `TRELLO` `BITBUCKET`

Product features

Confluence Whiteboards - A new digital canvas to brainstorm, turn ideas into action, and visualize work.

Jira Work Management free with Jira Software This intuitive platform for business teams to collaborate, align, and deliver work, is now free for all Jira Software Cloud customers through March 2024.

Confluence external collaboration - Securely add guest collaborators to specific Confluence spaces with the ability to restrict access to sensitive information. Add up to 5 guests to a space for no additional cost.
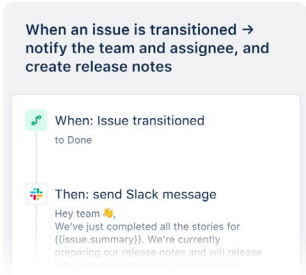

Confluence public links - Share a view-only version of a Confluence page with anyone on the internet (without needing to pay for an extra license).

Confluence databases - Structured, dynamic tables that help your team connect and organize information like Jira tasks, Confluence pages, owners, due dates, statuses, and more in one database table.

Operate more efficiently

Scale, optimize, and protect what you've built to support a growing number of users, customers, and stakeholders.

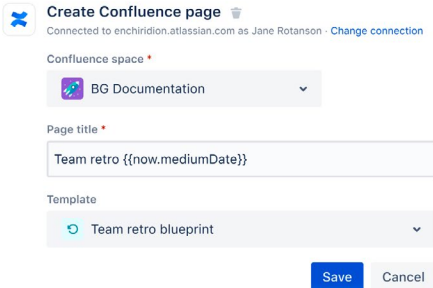

Cut out the mundane and repetitive by using *Jira Software automation* that expands across first and third party tools.

Platform features

Expanded automation – Connect tools and teams with cross-product automation rules across your favorite Atlassian and 3rd-party tools like Microsoft Teams, Github, LaunchDarkly, and more.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT`
`CONFLUENCE`

Bring your own key (EAP) – Encrypt Jira standard and custom issue field data with a key you manage in your own instance of AWS KMS.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT`

Expanded audit logs – Comprehensive audit logs of both admin and user-controlled permissions changes.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT`
`CONFLUENCE` `BITBUCKET`

Expanded user counts – Get near real-time data on how many users have access to their Cloud products that are managed within admin.atlassian.com.

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT`
`CONFLUENCE`

Data residency expansion – Available in the United States, Australia, and the EU (including Germany).

`JIRA SOFTWARE` `JIRA SERVICE MANAGEMENT`
`CONFLUENCE`

Product features

Beacon (beta product) – A dedicated tool for real-time alerts for suspicious user activity for both insider and outsider threats.

Compass (beta product) – Mission control for distributed architecture, offering a holistic view of software development over time.

Confluence space templates – Enjoy a new and improved space creation experience with 13 new customizable templates that are purpose-built for each team's unique way of working.

Jira Service Management automatic change requests for GitHub + GitLab – Our list of supported CI/CD tools includes Bitbucket, Jenkins, CircleCI, Octopus Deploy, and now GitHub and GitLab.
